

It Can Wait

Dear Distracted Driver,

Was it worth it?

To look at that one last message,

To send that one last text.

Could it have waited?

One more minute,

One more second.

Why did it have to be you?

To pick up your phone while driving,

And leaving us with an unfillable hole.

Love,

Those who loved you

Distracted driving is dangerous. Everyday, around eight people are killed in crashes in the United States because of distracted drivers. Don't let yourself be one of them. Take the "[It Can Wait](#)" pledge and start making a difference.
